*Welcome to
our universe*

The journey begins here

WINDOWS TO INFINITY

The Dreamer's Vision

Amid the echoes of an old train station, your dream began. There, where time stands still and light filters through the glass, you saw the endless corridor. Each window spoke to you with a different voice: seas, creatures, trains, entire worlds. You moved forward without fear, with the certainty that everything you imagined could exist. And when you awoke, the dream had a face, a form, a name: Ramón Colomer. From that moment a vision was born that no longer belonged only to a dream, but to everyone who looks, and who dreams again.

By Lucía

The Endless Universe

Creation that knows no limits

Windows to Infinity was born from a dream: to create a universe where art, imagination, and emotion fuse to give life to worlds that can exist only beyond the limits of reality.

Each window opens to a different story, some filled with adventure, others with beauty, reflection, or hope. But they all share the same heartbeat: that of human emotion.

In this cosmos, worlds of light and shadow coexist with ancient civilizations, impossible landscapes, and visions that speak of destiny, life, and memory. It is a universe where art transforms into experience, and every story becomes a journey into the deepest parts of the soul.

**By opening each window, you become the traveller.
Because Windows to Infinity is not something just to be watched... it is something to be lived.**

*In Olympia, the gods ruled not only
as a symbol of power, but also of
justice and order in the cosmos.*

Reflections from Infinity

Messages from the universe

At the heart of Windows to Infinity lies more than art: there is also a voice. Each creation arises from a deep emotion, from an idea trying to be understood, from a truth that can only be expressed through beauty.

Some visions speak of harmony with nature, others of the passage of time, the power of forgiveness, or the fragility of the human soul.

These works do not impose answers: they invite you to feel. And when the travellers become immersed in these works, they discover that each story is also a reflection of themselves.

Windows to Infinity is a mirror of the human soul, a place where dreams and consciousness meet.

The Birth of a World

From Thought to Infinity

Everything begins in silence.
An idea, a spark, a thought seeking form.
This is how the worlds of Windows to Infinity emerge: first in the creator’s mind, then in the first strokes of a sketch, a silhouette drawn more by intuition than by rules.

Every line is a possibility.
Every shadow, a doorway.
Worlds take shape between paper and thought, as imagination begins to build matter, light, and emotion.
There are no plans or formulas, only vision.

A vision that expands, that grows, that demands to become real.
And so the first spaces arise: impossible landscapes, figures that breathe within the dream.

Windows to Infinity is born from this impulse: to create worlds from the imagination; to transform the invisible into something that can be felt.

**“Before existing in the world,
every idea lives in the soul.”**

*The fierce megalodons in
“Echoes of Prehistory.”*

The Souls of Infinity

Energies, Symbols, and Presences

Beyond its worlds and forms, Windows to Infinity is inhabited by forces that embody the eternal: memory, hope, light, curiosity, and redemption.

These presences and faces shift and transform with each story: sometimes human, sometimes abstract, but always recognizable. They are echoes of our deepest emotions, reflections of who we were, who we are, and who we will become.

There are no heroes or villains.
Only souls seeking their place in eternity.

“The soul of every creation is a fragment of the universe that dreamed it.”

Messages and Values

Art as consciousness

During the creative process of Windows to Infinity, the messages emerged naturally, as if the creations themselves revealed them. From each vision arose a reflection, a reminder of what truly matters: compassion, respect, freedom, memory, and love for life.

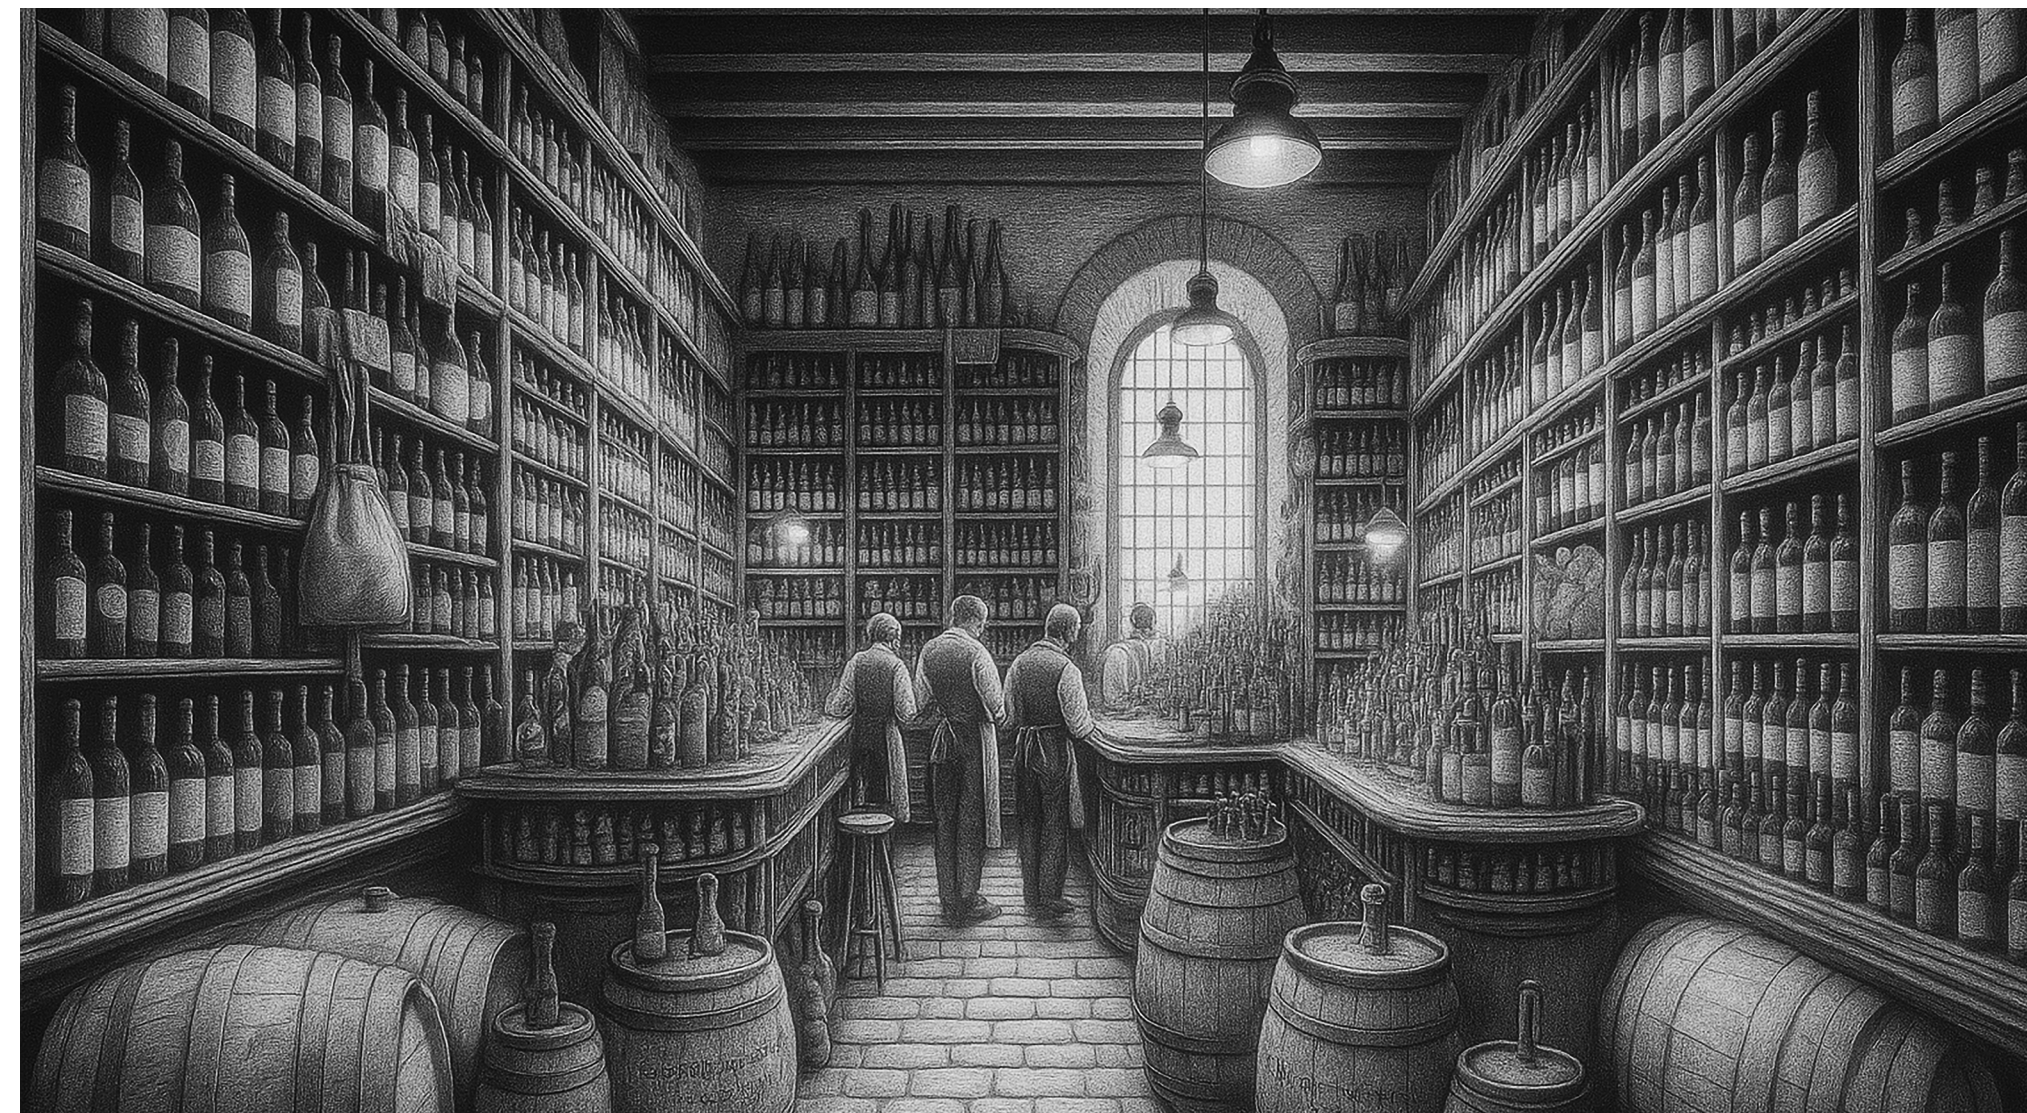

Because art, when true, does not merely decorate the world: it transforms it.

These values were not added at the end: they were born within the creation itself. They are the heartbeat that gives meaning to the entire universe; the reason why each story moves and inspires us, and makes us think.

“If a single gaze is changed after seeing a work of art, it has already fulfilled its mission.”

The spectres of Thorne Manor still sit at eternal banquets.

A Neapolitan cellar displaying the riches of its harvests.

The Kingdom of Eldoria, where humans and magical creatures live in harmony.

Etheria's most precious source of energy, the Living Light, takes the shape of The Light Steeds.

*Lyra and Kael embark on their journey to
The Forest of Whispers in “Aelyon and the Alliance of Light.”*

*Thorne Manor, from
The Kingdom of the Eternal Night.*

The Vision of Ramón Colomer

Creator of the Windows to Infinity universe

For more than four decades, Ramón Colomer has explored the boundaries between art, emotion, and imagination. His vision does not seek to reproduce reality, but to expand it, to make the invisible visible, and to transform imagination into experience.

From this pursuit, Windows to Infinity was born: a universe created to move, inspire, and awaken consciousness. Every story, every colour and every form is part of a language that unites the tangible with the dreamlike.

Colomer sees art as a bridge between generations; a form of communication that transcends words and touches what we all share: the capacity to feel. That is why his work is not meant to be observed; it is meant to be lived. His mission is not to teach, but to move.

**“Art does not end in what we see;
it begins in what we feel.”**
Ramón Colomer

First sketches of Captain Black.

The journey continues

The Exhibition

Culture in motion

We are creators of traveling exhibitions and shows that cross physical, emotional, and cultural boundaries. With over 35 years of experience in design, construction, and ephemeral installations throughout Europe, we have a deep, technical, and precise knowledge of the sector.

With studios in Tarragona and Madrid and more than 10,000 m² of working space, we offer comprehensive services that range from artistic design and production to fabrication, logistics, and installation of exhibition and commercial spaces.

Expotour Itinerant, working through its production company Infinity Studios, makes the Windows to Infinity exhibitions possible: transforming ideas into real experiences, combining creativity, technical expertise, and impeccable production for exhibition halls, museums, and cultural centres.

We are culture in motion: an alliance of art, engineering, and emotion that brings to life worlds designed to travel and inspire.

Our philosophy

Our approach combines artisanal tradition with technological innovation. From physical structures to immersive digital experiences, we approach each project with a holistic vision, preserving the soul and identity of every institution, theme, or cultural narrative.

For us, art is the origin of everything. Every project is born from an artistic idea, from an emotion, from a story that needs to be told. Digital tools such as including virtual reality, augmented reality experiences, 360° projections or special effects, are not the final objective, but rather the means to amplify emotion, so that visitors live the experience more intensely.

Our experiences are designed for all audiences and cultures, for both young and old. We believe in a universal art that unites generations, sensitivities, and languages, enabling each person to find their own reflection within our creations.

Each work of art also conveys values and messages that invite contemplation, creating a dialogue between heart and mind. We strive for each experience to leave a mark, an inner echo that endures long after the visit.

*Art always comes first.
Technology amplifies it;
never replaces it.*

The Innovators

The heart of Expotour Itinerant is its people: The Innovators. A team made up of artists, designers, engineers, filmmakers, and many others.

Their mission is to bring every artistic vision to life with technical excellence, boundless creativity, and a deep emotional connection with the audience. Every exhibition, every piece of art and every immersive experience is developed entirely by this multidisciplinary team.

We have technical studios, graphic design and 3D modelling departments, programming and special effects teams, as well as experts in virtual and augmented reality and film production. This structure allows us to shape complex ideas and turn them into experiences that blend art, science, and emotion.

The Innovators are the foundation of everything we do: a passionate team that unites talent, technique, and sensitivity to create worlds that inspire.

Our Universe

Windows to Infinity: The Exhibition

At Expotour Itinerant, we present our main collection: the Windows to Infinity universe: a work that brings together different immersive experiences designed to create unique exhibitions anywhere in the world.

The installation is entirely modular: everything is designed from the beginning to ingeniously adapt to different spaces. Each of our pieces: the Monumental Visions, immersive rooms, virtual and augmented reality experiences, virtual photocalls, the Grand Central Model, and the 360° room can be a part of a full exhibition or be combined in different ways depending on the space, audience, or goals of each project.

We have also devised three different formats so that no venue, from the largest to the smallest, is left without the possibility of hosting the exhibition.

From a single experience to a complete exhibition, Windows to Infinity transforms every installation into an unprecedented artistic, technological, and emotional journey.

Our exhibition solutions

Expotour Itinerant offers three exhibition formats for the Windows to Infinity universe, adapted to different scales and needs to bring immersive art to every corner of the world. Each version maintains the same artistic, technical, and emotional quality that defines the project.

Windows to Infinity - The Great Odyssey

For large outdoor spaces. The monumental and complete version, designed to offer a full day of total immersion.

Windows to Infinity - The Experience

Created for large pavilions or outdoor marquees. A large-format exhibition that offers a half-day experience of artistic and sensory enjoyment.

Windows to Infinity - The Essence

Designed for smaller exhibition halls. The most compact and accessible version, ideal for an experience lasting between two and three hours.

Windows to Infinity

The Great Odyssey

The monumental experience

The most spectacular and complete version of Windows to Infinity. Designed for outdoor spaces in which majestic scenic marquees are installed. It offers a fully immersive experience in which visitors can spend an entire day enjoying art, technology, and emotions.

So many experiences are connected in this great journey:

Live art demonstrations bring the Windows to Infinity universe to life, with artists creating original pieces in real time. Visitors can participate in interactive workshops, virtual and augmented reality zones, virtual photocalls, areas dedicated to the creative process, as well as artistic spaces showcasing sculptures, dioramas, Monumental and Artistic Visions and the Grand Central Model.

The journey is enriched by storytellers, puppets, and characters from our universe who engage directly with the audience. Resting and dining areas as well as themed boutiques complete an immersive experience designed for all audiences.

The heart of the experience culminates in a 360° room with state-of-the-art special effects: a spectacular creation that redefines the boundaries of immersive art, and places Windows to Infinity at the forefront of global visual innovation.

This unique and enveloping experience gives each city the opportunity to spend an entire day in celebration of art, imagination, and cutting-edge technology.

Recommended surface area: from 10,000 m².

Ideal location: outdoors, open-air cultural venues, or large fairgrounds.

Windows to Infinity

The Experience

The large-format exhibition

A powerful and balanced version that retains the essence of Windows to Infinity, adapted to a more concentrated scale.

It is designed for large pavilions or outdoor tents, offering the public an immersive experience with huge visual and emotional impact, while maintaining the spectacularity, narrative, and atmosphere of the original project.

This version is fully adaptable to each space and project.

It can include different experiences from the Windows to Infinity universe, such as virtual or augmented reality zones, workshops, themed boutiques, Monumental Visions, Artistic Visions, and the Grand Central Model, which are all tailored to the environment and specific needs of each client.

Each production is custom designed, making the most of the venue's possibilities and offering an intense, immersive, and deeply emotional artistic experience.

This exhibition can also incorporate the 360° immersive room with state-of-the-art special effects, designed to enhance the experience and transport the visitor to the heart of the Windows to Infinity universe.

A complete and versatile format, designed to offer between four and five hours of artistic and sensory enjoyment. It is ideal for spending a full morning or afternoon living an unforgettable experience.

Recommended surface area: from 3,000 to 5,000 m².

Ideal location: large pavilions or outdoor marquees.

Windows to Infinity

The Essence

The concentrated experience of the universe

The most compact and accessible version of Windows to Infinity, created to bring this artistic universe to all types of spaces, audiences, and cities.

Designed for indoor cultural halls and exhibition centres, with lower ceilings and limited access points. It preserves the magic, storytelling and grandeur of the original project, carefully adapted into a more agile and efficient format.

Its modular assembly system is quick, and cost-effective, so that the entire experience can be installed within hours.

The artwork and experiences are presented in scaled-down versions that maintain all their visual and artistic impact.

This format includes the Monumental Visions, Legendary Artistic Visions, virtual and augmented reality experiences, virtual photocalls, creative processes, and the Grand Central Model, all adapted to the size and layout of each venue.

It is designed to offer an experience lasting from two to three hours, ideal for those seeking to provide visitors with an immersive, artistic, and technically flawless proposal.

Recommended surface area: from 600 to 1,500 m².

Ideal location: medium-sized exhibition halls, cultural centres.

Immersive

Virtual Reality

Augmented Reality

360° Projection

Immersive and Virtual Experiences

When technology amplifies art

The immersive and virtual experiences of Windows to Infinity combine art, technology, and emotion to expand the limits of perception. Through virtual reality, augmented reality, and special effects, visitors can immerse themselves in the creative processes, interact with the artwork, and experience it from new dimensions.

Each experience: The Mutant Room, The Creative Process, The Interactive Workshop, The Monumental Dimension, and The Virtual Photocall, invites visitors to explore art from within, blending reality and fantasy in a unique and unforgettable event.

All our experiences are designed for all audiences, for both young and old.

Immersive Experiences

The Mutant Room

An immersive room with 360° projections, spatial sound and practical effects that transport visitors to stunning worlds. The Monumental Visions take shape within the room, transforming the space into an unprecedented immersive experience. A masterpiece where creativity, innovation, and wonder emerge as invincible forces.

The Creative Process

An authentic workshop where the worlds of Windows to Infinity are created. Amid tools, colours, and projections, visitors can step inside and see how the creative process unfolds to give life to the exhibition.

Enchanted Creatures: Little Adventures

A colourful puppet show that transports children to different magical worlds full of heroes, creatures, and captivating situations. Skilfully and gracefully brought to life, these puppets perform playful scenes from the Windows to Infinity universe.

Storytelling: Meeting the Heroes

Characters from various worlds within the Windows to Infinity universe come alive and engage with visitors to share their stories, secrets, and adventures. An interactive and theatrical experience designed to offer inspiring, entertaining, and exciting tales.

Virtual Experiences

The Virtual Photocall

Using augmented reality, visitors can choose from a variety of characters, worlds, and landscapes from the Windows to Infinity universe to take photos as if they were part of the story. This is a fun way to immortalize their visit, with photos that can be saved in both digital and printed formats.

The Monumental Dimension

With virtual reality headsets, visitors can soar over the Windows to Infinity worlds in a hot air balloon without leaving the room. Panoramic views of a pirate island, the eerie atmosphere of a haunted mansion, and the monumental scale of the Seven Wonders of the Ancient World are just some of the experiences in this journey.

The Magic Behind the Art

Through 360° footage recorded during the actual creation process of the Windows to Infinity exhibition, and thanks to immersive virtual reality headsets, visitors can step inside our workshops and experience every sculpture, brushstroke, and stage design as if they were there in person.

The Interactive Workshop

An augmented reality workshop where physical and digital worlds intertwine. Visitors can explore additional content to enrich their experience in the exhibition, discovering different visual, auditory, and narrative elements that reveal a bit more about the characters and stories of the Windows to Infinity universe.

Monumental Visions

The narrative heart of Windows to Infinity

The Monumental Visions are at the centre of Windows to Infinity: large-scale pieces that bring entire universes to life, where art, technology, and emotion merge into one heartbeat.

Each Vision is a story, a sensory and visual experience that combines sculpture, painting, special effects, sound, and cinematic projection. Visitors do not simply watch these creations, they discover them through a monumental window that opens into other worlds. The audience looks through and is instantly captivated by what they see: digitally designed figures, hand-finished by artists and sculptors, landscapes that come to life among lights, shadows, and movement, waves rising, volcanoes breathing fire, skies changing colour. A film envelops the entire scene and connects it with the story being told.

Monumental Visions

Each Vision tells its own story: a feat, an emotion, a message, developed in a perfect fusion of traditional art and contemporary technology. Themes include adventure, classic works of art, ecology, fantasy, and futurism.

In each scene, the viewer is transported to a different time and space: from lost civilizations to worlds yet to come; from natural landscapes that awaken consciousness to epic tales celebrating human imagination.

A show for all audiences, where art is transformed into experience, and each window opens up a new world.

The Guardians of Eldoria

Among enchanted forests and mountainous landscapes, dragons and other mythical creatures emerge as allies and adversaries to test faith, courage, and love as redemptive forces.

The Fate of Etheria

In a kingdom where magic and nature exist together in harmony, a military invasion sparks a war for Etheria's most precious resource: The Living Light. The Etherians must find a way to restore balance.

Monumental Visions

The Kingdom of the Eternal Night

Jonathan Thorne returns to his family's mansion after years of exile in an effort to free his lineage from the curse that haunts them. He must face creatures of the darkness and the very ancestor who condemned the Thorne family with his blasphemous experiments.

Lights of the Past

A tribute to the greatness of ancient civilizations that knew how to combine ingenuity and devotion to create architectural wonders dedicated to the divine and the unattainable.

Tiger's Eye and the Secret of Lost Island

Captain Isabella and her brave crew sail the seas in search of the legendary treasure of Captain Black. Through dangers, riddles, and traps, they discover that not all treasures can be locked in oak chests.

The Splendor of Naples

A complex art piece that blends craftsmanship, history, and cultural diversity. Inspired by 17th century Naples, it combines realism, detail, and tradition to celebrate universal beauty and humanity shared through art.

Monumental Visions

A Sustainable Journey

A tribute to the magnificence of Earth as a living organism; a mosaic of mountains, prairies, wetlands, grasslands, deserts, and oceans, where each being forms part of a delicate balance.

Echoes of Prehistory

An impressive portrayal of the giants of land, sea, and air that dominated our planet 66 million years ago, and of how nature changed everything.

Aelyon and the Alliance of Light

In a kingdom divided between light and darkness, the young elf Aelyon is chosen by an ancient prophecy as the last leader capable of guiding an alliance of heroes in a fight to restore balance.

The Final Countdown

Humanity faces an alien invasion. The survivors rally under the leadership of Alex Rivera and Dr. Zhou. At a decisive moment, their only chance of survival will depend on placing their trust in extremely dangerous resources.

Artistic Visions

The Artistic Soul of Windows to Infinity

The Artistic Visions are the most intimate and contemplative core of Windows to Infinity. They show art in its purest form, without artifices or effects, stirring up emotions from matter, form, and light. Here, the creative process is as valuable as the final work. Each piece is the result of meticulous sculpture, painting, and composition, crafted by artists who transform matter into beauty.

These Visions are a celebration of human art, a tribute to our capacity to imagine, create, and move. In them, the tradition of the ancient workshops of the great masters merges with contemporary visual language, creating artwork that transcends time.

The Artistic Visions are divided into two large groups:

Legendary Artistic Visions: inspired by The Seven Wonders of the Ancient World, which reimagine the myths, architecture, and grandeur of past civilizations with a contemporary perspective.

Thematic Artistic Visions: these pieces present landscapes, universal values, and reflections on life, time, and consciousness, using beauty as a pathway to thought and emotion.

Experience art in its purest and most essential form.

Artistic Visions

Legendary

The Seven Wonders of the Ancient World

The Legendary Visions are a tribute to the myths and magnificence of ancient civilizations. Inspired by The Seven Wonders of the Ancient World, these works of art reimagine with contemporary sensitivity the splendour of the Hanging Gardens of Babylon, the Temple of Artemis at Ephesus, the Statue of Zeus at Olympia, the Mausoleum at Halicarnassus, the Colossus of Rhodes, the Lighthouse of Alexandria, and the Great Pyramid of Giza.

In this space, there are no special effects or technological enhancements: just art in its most traditional form, accompanied by an atmospheric video that envelops the sculptures and deepens their spirit. Each piece is an aesthetic and symbolic interpretation of the eternal: an encounter between history and imagination, where form, light, and composition awaken the viewer's emotions.

The Seven Wonders of the Ancient World

The Great Pyramid of Giza

The Lighthouse of Alexandria

The Colossus of Rhodes

The Hanging Gardens of Babylon

The Mausoleum at Halicarnassus

The Statue of Zeus at Olympia

The Temple of Artemis at Ephesus

Artistic Visions

Thematic

Art as consciousness

The Thematic Visions represent the most emotional and reflective side of this artistic universe, where art becomes both message and consciousness. The themes revolve around human values: life, origin, time, nature, and hope. These are landscapes and symbolic scenes that invite quiet contemplation. Crafted using noble techniques and materials, every stroke and every texture carries the imprint of the artist's hand and their vision of the world.

There is no artifice, only art in its most authentic form. A celebration of human creation in its most honest and essential expression, where visitors to the exhibition do more than observe... **they feel.**

Art as consciousness

Silent Voices

A Universe of Wonders

The Grand Central Model

At the heart of Windows to Infinity lies the Grand Central Model, a 140 m² masterpiece that welcomes visitors and marks the beginning of their journey.

Conceived as a miniature theme park, this model recreates all the worlds of the exhibition in a fascinating panoramic view.

Amidst mountains, oceans and imaginary cities, steam trains traverse its landscapes, and hot air balloons soar across the universe, creating a spectacle full of movement, light, and intricate details.

Every element has been handcrafted, combining technical precision with artistic sensitivity to capture the essence of the Windows to Infinity universe.

This piece is part of the Windows to Infinity: The Grand Odyssey and Windows to Infinity: The Experience versions, where it is presented in all its splendour.

A more compact adaptation has been created for the Windows to Infinity: The Essence version. It is specifically designed for smaller exhibition spaces while retaining all its magic, detail, and awe-inspiring impact.

Here's where the visitor's journey begins: standing in front of a miniature universe where each world waits to be discovered.

Journey guide, audio guides, and video guides

These are an immersive companion in the exploration of each world.

At Windows to Infinity, each visitor becomes an explorer. At the start of their journey, they receive the journey guide: a carefully crafted book that goes with them throughout the experience. More than just a map, it is a companion on their adventure: providing guidance, interesting facts, and both technical and artistic information about each zone, as well as links to explore the digital content of the exhibition in greater depth.

Along the way, each space is connected through interactive audio guides and video guides that can be accessed directly from the visitor's mobile phone. Using QR codes, guests can discover the original music of each artwork, listen to the stories that inspired each world, watch videos about the characters and the narratives surrounding them, and access artistic reflections, critiques, and documentaries that further enrich the experience.

All digital content has been created specifically for Windows to Infinity, turning the visit into a fully immersive experience where art, storytelling, and technology intertwine in a single living event.

All content is available in multiple languages, always including the local language, to ensure that visitors from any country can enjoy and understand the exhibition in their own language.

This combination of book, sound, and image transforms the journey into a living, immersive, and limitless experience, where knowledge and emotion advance hand in hand.

Innovators in Action

Live art as a show

Imagine watching the creators of the Windows to Infinity universe transforming inspiration into art in real time. Lights, live music, giant screens, immersive projections, laser beams, smoke, and pure energy: the audience cheers, the countdown starts... and the creative battle begins.

Innovators in Action is an explosive show where artists, designers, sculptors, and technicians become performers, creating in front of thousands of spectators. Each performance is a unique experience. The audience issues the challenge, choosing the artist and the discipline and starting the countdown, which can be seen on all the screens.

A showman directs the action, cameras capture every detail—brushstrokes, 3D modelling, animation, visual effects, projections—broadcasting it all live, as if it were a movie.

The stage pulses with music, lights synchronize with the rhythm, and the artists work under exhilarating pressure, sharing their creative process with the audience, who cheers them on and celebrates with them.
This is not a demonstration.
This is not a workshop.
This is a creative battle. This is art in motion.

Each show is recorded in 360° format, allowing the audience to relive the experience in virtual reality and take home their personalized video as a souvenir. The show also includes The Virtual Photocall, where visitors can take photos in the worlds of Windows to Infinity, choosing from various iconic characters of the universe.

Innovators in Action can be presented as a standalone show or as a natural extension of the Windows to Infinity exhibition, offering a complete experience where technology amplifies human talent and art becomes pure emotion.

More than a show, it's a celebration of art, where inspiration is measured in seconds and creativity ignites before the eyes of the world.

Art in Your Hands

Art as play, play as art

Art in Your Hands was born from idea close to the heart of the creator of Windows to Infinity: the passion for sharing art with the younger generations and awakening their creativity. For years, in his own workshop, Colomer invited children, friends, and visitors to create together. In just a few hours, sculptures and compositions full of magic would emerge, unique pieces that many still treasure today. From this experience, a new format began to emerge, which has now become something greater: an immersive, educational, and emotional activity where children transform into artists.

Guided by the Innovators, the participants create their own artwork inspired by the worlds of Windows to Infinity: dioramas, sculptures, or fantastical scenes created with pre-designed materials and techniques adapted from the professional creative process. Everything happens in a vibrant environment, full of colour, music, and live screens that project every step of the process, turning the workshop into an interactive show.

Art in Your Hands can be set up either in a standalone format or integrated within the exhibition, adaptable to indoor, outdoor, or tent settings. It features highly versatile, fully equipped workstations, designed for modular assembly. It also includes live screens and The Virtual Photocall, where children can have their photo taken

alongside their creation or with the characters from the Windows to Infinity universe.

More than a workshop, it is an artistic experience that educates and inspires. Each child not only takes home a work created with their own hands, but the emotion of having been part of a real artistic process.

A memory that awakens vocations, nurtures aesthetic sensitivity, and ignites the creative spark that we all carry within.

Art in Your Hands: because art is not taught... it is shared.

Visitors' opinions

The feedback collected during the trials conducted between 2020 and 2023 reflects the overwhelming success of the exhibition.

Visitors highlight Windows to Infinity's ability to provoke deep emotions, from awe to nostalgia, in an experience that transcends the conventional. Many visitors also expressed that the exhibition has transformed their perception of art and history: it has helped them connect emotionally with the past in a new and surprising way.

From the admiration of children to the reflections of adults, Windows to Infinity has been described as a project that resonates in the hearts of all who visit it.

"It has surprised me immensely. It evokes very intense emotions."

"It makes you dream, it's incredible how an artist is able to transmit what they see and that you can enjoy it."

"It's much more than what I expected, there's a mix of everything, from landscapes to spectacular scenes."

"I wish the artist all the strength he needs to make this exhibition huge and take it around the world, because these creations are just perfect."

"The first thing I thought was 'this must have taken a lot of time and effort, it's incredibly good'."

"What caught my attention was how impressive it was, it's magnificent."

"It is the work of a true artist."

"Mind-blowing, you have to see it."

"It's extraordinary and stunning."

"We were amazed."

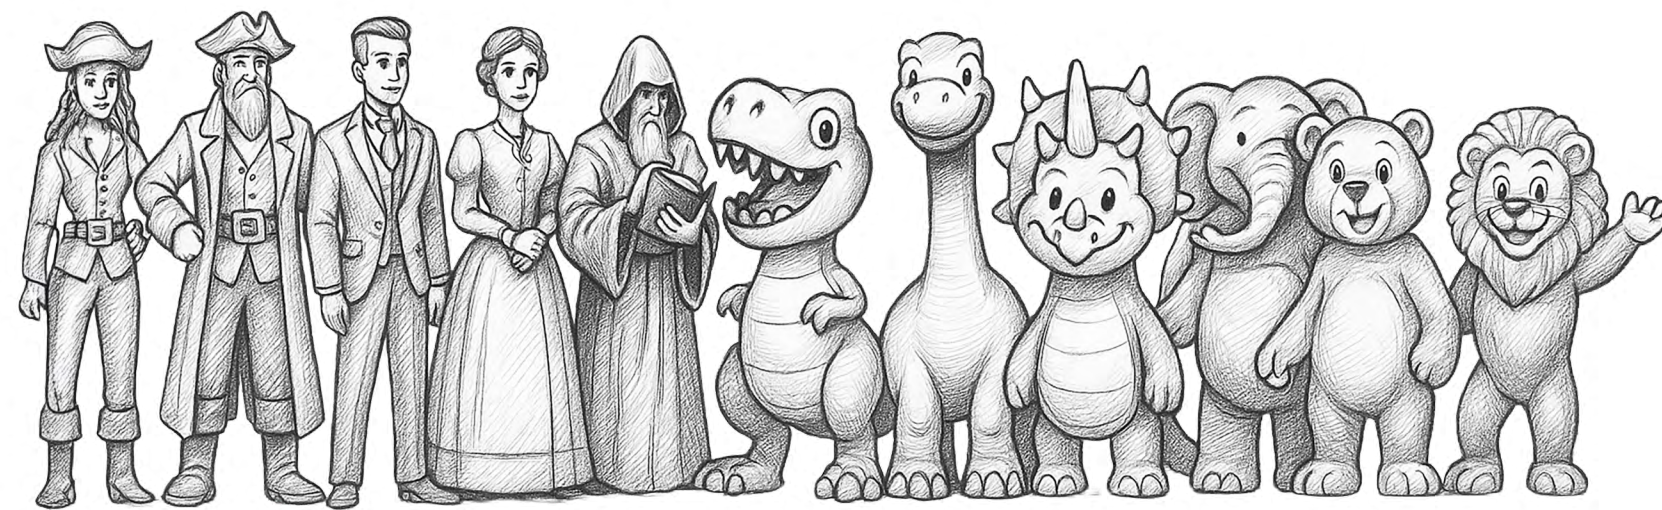

"Spectacular."

"Incredible, don't miss it!"

Our values

Our values

Commitment to Culture

At Expotour Itinerant, we understand culture as an essential asset, a common language that connects people across borders and generations. Our work goes beyond showcasing art: we exist to share it, make it accessible, and bring it closer to every audience. We collaborate with museums, institutions, and creators from around the world to ensure that each project becomes a living, open, and participatory experience.

We believe that culture does not belong to anyone, it belongs to everyone.

Commitment to the Planet

From the very beginning, Windows to Infinity and Expotour Itinerant were founded on a clear principle: to create without destroying. That's why we work with recycled materials, modular structures, and low-energy technology. Every installation is designed with respect for the Earth, reusing and transforming what others discard.

The mark we leave is not physical; it is emotional.

Because art should not leave waste... only memories.

Commitment to Values

Behind every artwork, behind every vision, there is a human and artistic need: to communicate a message, to awaken deep emotions, and to create awareness. During the creative process, there is an impulse to convey what moves us: a reflection, a warning, a hope. These messages, which are present in every piece, touch on universal themes: compassion, justice, empathy, memory, respect, and freedom.

It is not uncommon to see the audience moved to tears, because the art pieces are not just observed: they are lived. This project is a bridge between art and humanity.

A call to rediscover what is essential, and to remember that we are all part of the same universe.

Commitment to Cultivating Professions

We believe that a powerful experience can plant a seed that, even if dormant for years, can emerge at any moment in the form of art, an idea, a vocation; even all three at the same time. We believe in learning through doing and we are proud and ready to provide new generations with extraordinary experiences, full of content and teachings that encourage them to seek beyond the ordinary. Windows to Infinity hopes to inspire in everyone a spark to search for what is meaningful, or even better: to create it.

We are filled with pride when we see the smiles of children as they marvel at the details they find in our worlds, knowing that something in our art has truly resonated with them.

It is our hope that each person leaves with an experience they will want to relive and recreate in their own voice and with their own message.

The journey continues

This universe has no end.

It was born from a dream, shaped by many hands, and today it lives on in every person who dares to imagine.

My mission is not only to create art, but to share it: to show how it is born, to open the doors of the process, and to spread the passion that drives me.

That's why we hide nothing: we show our artwork as it is being built, we show the sketches, the materials, the first strokes that give form to the impossible.

Through virtual reality headsets, the audience can step into our real-life workshops, see how we work, how we sculpt, how we print, how ideas come to life.

With Art in Your Hands, we teach children and families to create, to discover art from within, and to unleash the spark that we all carry inside.

In each exhibition, our artists create in real time, sharing that unique energy of the moment when art happens.

I don't believe in art being kept a secret.

I believe in art that is shared, that teaches, that inspires, and that awakens.

Because we all have something inside waiting to come out: a spark that, if ignited, can transform the world.

Every child who marvels, every gaze moved by wonder, every person who begins to believe again in their own creativity, is a seed for the future.

And it is for them that this journey will continue.

One day we will leave this universe in their hands, and it will be them the dreamers of tomorrow, who will keep expanding this infinity.

Because art does not end when the artist stops creating...

it ends when no one dares to dream.

Ramón Colomer

Creator of the Windows to Infinity universe

Director of Expotour Itinerant

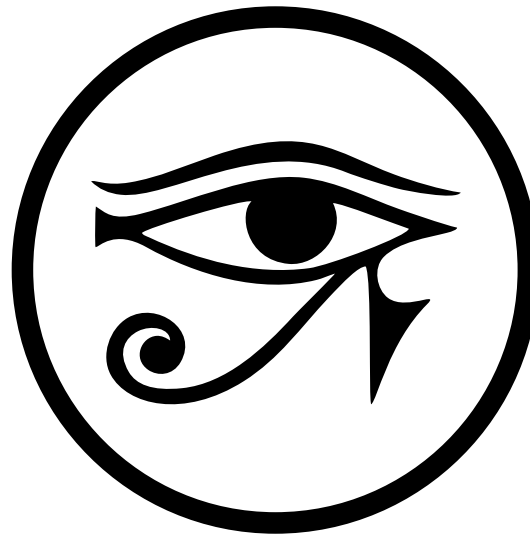

If there is a city that looks to the future with hope, Windows to Infinity will invite it to dream.

We bring stories, light, and creativity to every corner of the world,

building bridges between imagination and reality.

If you want to learn more or join this journey, get in touch with us.

Where there are dreams, art is born.
